

EXECUTIVE COMPANY PROFILE

Enterprise Risk Mitigation · Critical Infrastructure Protection · Digital Security Operations

MAINLAND TANZANIA & ZANZIBAR

A disciplined security partner combining professional protection, technology-enabled oversight and advisory-led risk management.

01 / POSITIONING

Security designed as an operating system for risk.

BlackRock Security (T) Limited is presented as an end-to-end security risk management firm operating across Mainland Tanzania and Zanzibar. Its operating model combines protective protocols, digital surveillance and structured field supervision.

OPERATING PROFILE

From guarding to integrated risk management

The source profile describes BlackRock as a security risk management firm serving sovereign entities, multinational corporations, extractives and high-value commercial infrastructure.

- Police-vetted and licensed guard force
- Armed rapid response capability across high-risk zones
- AI-driven CCTV and digital guard verification
- Close protection and secure executive mobility
- Structured mobilisation, supervision and SOC monitoring

OPERATING PRINCIPLES

Control. Visibility. Accountability.

The model is built around disciplined deployment, measurable post orders, real-time verification and direct management access.

CONTROL

Clear post orders, escalation paths and KPIs.

VISIBILITY

Checkpoint scans, incident logging, telemetry and surveillance.

ACCOUNTABILITY

Field supervision, client feedback loops and rapid guard replacement.

The company profile also states that BlackRock operates under local regulatory licensure and coordinates closely with the Tanzania Police Force.

02 / SERVICE PORTFOLIO

Four capabilities. One integrated security posture.

BlackRock's service architecture spans physical protection, technology-enabled surveillance, executive protection and human-capital development.

01	STATIC & MOBILE FORCE PROTECTION	Police-vetted guards; armed rapid response units; fire watch and incident management; access control and counter-trespassing protocols.
02	TECHNICAL SURVEILLANCE & CYBER INTELLIGENCE	AI-driven CCTV; remote live camera telemetry; automatic incident tagging; digital guard verification; network monitoring and threat intelligence.
03	EXECUTIVE PROTECTION & MOBILE LOGISTICS	Close Protection Officers; defensive tactics; evasive driving; route clearance; GPS-enabled fleet integration; encrypted escort communications.
04	ISO-ALIGNED TRAINING & HUMAN CAPITAL	Mandatory 40-hour induction; de-escalation; post orders; access protocols; PR24/baton handling; uniform and bearing standards; continuous drills.

TECHNOLOGY AS FORCE MULTIPLIER

BlackRock's technology proposition connects surveillance, guard verification and incident reporting so that physical security activity becomes more visible, traceable and manageable.

03 / DELIVERY ARCHITECTURE

A five-stage mobilisation model.

The transition architecture establishes a repeatable path from risk assessment to active supervision and SOC monitoring.

01

COMPREHENSIVE AUDIT
In-depth risk assessment, site survey and threat-vector mapping.

02

POST ORDER DESIGN
Tailored protocols, emergency escalation paths and KPIs.

03

VETTED GUARD SELECTION
Officers selected against site requirements and background checks.

04

DEPLOYMENT & TECH SETUP
Onsite induction, checkpoint setup and live telemetry integration.

05

ACTIVE SUPERVISION
Field supervisor oversight, client feedback loops and SOC monitoring.

FIELD GOVERNANCE

FIELD SUPERVISION	SOC OVERSIGHT	CLIENT ACCESS
Regular field inspections and continuous drills are described as part of the operating model.	24/7/365 monitoring supports live oversight and incident visibility.	Clients receive direct access to senior management rather than automated call delays.

04 / SECTOR EXPERIENCE

Security capability across complex operating environments.

The supplied capability statement identifies engagements across energy, diplomatic and institutional, aviation and infrastructure, hospitality and tourism, commercial and real estate, and retail and community environments.

VERTICAL	KEY ACCOUNTS	SCOPE
ENERGY & PETROLEUM	TOTAL Energies · ORYX Energies · GSG Petroleum	Depot access control, HazMat safety and fuel terminal guarding.
DIPLOMATIC & INSTITUTIONAL	Morocco High Commission · Smart Africa Group	Enclave security, diplomatic access control and executive protection.
AVIATION & INFRASTRUCTURE	Nungwi Airport · Brandmark Infrastructure · Rahisi Group	Perimeter control, passenger-flow screening and asset safety.
HOSPITALITY & TOURISM	Ndame Beach Hotel · Mystique Hotel · Bwejuu Villas · Michamvi Villas · SNOWVIEW Hotels	Discreet beachfront patrols, guest safety and resort perimeter guarding.
COMMERCIAL & REAL ESTATE	BEVCO Distribution · Peponi Properties · Bongoyo Properties · Canbury & Redstone Apartments	Loss prevention, access control and multi-tenant residential safety.
RETAIL & COMMUNITY	Everyday24 Supermarket · The Town Supermarket · St. Anne Academy · St. Matthew Parish	Crowd management, public safety and high-footfall surveillance.

The account names and engagement descriptions above are reproduced from the supplied capability statement; this profile does not independently verify those engagements.

05 / ASSURANCE & LEADERSHIP

Professional standards backed by management access.

The supplied profile frames client satisfaction and site integrity as operational imperatives, supported by rapid replacement commitments and direct senior-management access.

RAPID REPLACEMENT	DIRECT MANAGEMENT ACCESS	CONTINUOUS OVERSIGHT
Unsatisfactory performance triggers a commitment to rapid guard replacement within hours.	Clients receive 24/7 access to senior management without automated call delays.	Field supervision, feedback loops and SOC monitoring provide ongoing operational visibility.
